

## Ask For Them By Name

FOR IMMEDIATE RELEASE:

Minigrip, an ITW Company, announces the addition of their patented TearZone® feature to all Lab Guard® dispenser bags.

TearZone allows users to simply tear the Lab Guard specimen bag open between two lines to access bag contents. There are no perforations to compromise the safety of the bag or health of the technician. Minigrip has been marketing the TearZone feature on their TearZone® brand bags for 12 years. The largest reference laboratories already use TearZone.

In addition Lab Guard’s current unique 500 count dispenser box, Lab Guard will now also be available in Minigrip’s ‘tissue style’ 100 count DispenserBag™.

For more than 25 years, hospital and laboratory experts across the country have trusted Minigrip’s Lab Guard® bags for their specimen transportation.

**Minigrip, An ITW Company, is a global leader in reclosable packaging technology. Over 50 years ago, Minigrip introduced the first-ever integral zipper bag in 1959. Featuring a RED line on the lip, the Red Line™ brand of reclosable zipper bags was launched and has become synonymous with the highest quality zipper bag in the world.**

**Today, Minigrip offers innovative reclosable zipper bags for a broad range of markets and applications: Medical (Lab Guard, TearZone, and UVGuard brands); Industrial (Red Line and Zippit brands), Biodegradable (GreenLine brand), Specialty Industrial (Minigrip Custom), and Food Service (Slider Grip and ColorZip brands). For more information, visit the Minigrip website at [www.minigrip.com](http://www.minigrip.com).**
